NOT READY YET

Governor-General Wood, in his report on the Philippine question, advises that we retain control of the islands until the people there have had time to absorb and thoroughly master the power in their hands. Among the findings are that "the efficiency of the public service has fallen off and that they are now relatively inefficient due to lack of in experience and to the too rapid transfer of control to officials who have not had the necessary time for proper training," and that "there is a disquieting lack of confidence in the administration of justice, to an extent which constitutes a menace to the stability of the government."

CAPITAL BEING SUPPLIED

The stream of outside money has started to flow into the new camp. Royston and out of town interests are sure to reap the harvest of the foresight in arriving early on the ground of the high grade camp. Three of the big mining centers of the west are represented, San Francisco, Los Angeles and Salt Lake City. Others are sure to follow the lead taken by these interests and find a place for their idle capital in the development of the coming mining community.

ORIENTAL COMPETITION

A writer in the New York Tribune declares that we are obsessed with groundless fears of underbidding by the Chinese in the economic field, giving as a reason his views that the standard of living of the Orientals is rising. Perhaps it would be better to say it is rising. Fifteen cents a day is good pay for a Chinese, even at this time, and until the standard of living has risen far above what it is now, it will be the part of discretion of the United States to take due notice thereof and govern the tariff rates accordingly. This again brings up the question, Why do certain people industriously promulgate for free trade in the United States and thereby

LIFT THE BURDEN

An official and lady from Japan, told the public that nearly half of Japan's expenditures are for military armament. The Japanese representative at the conference might learn something even from an old woman.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

CO-OPERATIVE CLASSES

AN INTERESTING plan has been worked out by a certain high school in its commercial department. This is a cooperative method by which the girls get actual practical work together with the class work. For instance, in the salesmanship course the girls work one week in school and one week in some large department store alternately. The stores are making their inducements to young women who wish to become saleswomen more attractive, and they are seeking a high class of employees. And it is the girls who have taken a course of training with the view of becoming expert in the profession who are sought for. They begin at the bottom, while they are still working in the school, and by the time they have been graduated they are ready for a good position with every prospect of steady advancement.

The complete course includes designing, color matching, house furnishing, etc. A girl will specialize later in certain types of the work, but she is given a grounding in all. If she has a good foundation she is going to know what to sell her customers. She is unlikely to make bad sales, and so suffer returns.

With such school work and such training as are offered by the type of high schools quoted, a fine class of women is going to be attracted to the work in increasing numbers. The stores realize the value of the expert. It is a thing that will pay looking into by the ambitious business girl.

HEART WEATHER.

SKIES are not always amethyst. And stars are lost in midnight mist. The sun is curtailed by the rain. Day has its darkness, night its pain; And yet the hill the sun has kissed I know shall feel his kiss again.
